

Stainless Steel Mobile Bins

Short Description:

High-durability food-grade stainless steel mobile bins with lid and castor wheels, ideal for hygiene-focused industries.

Full Description:

Our Stainless Steel Mobile Bins are designed for durability, hygiene, and ease of use across various industries such as food processing, hospitality, and healthcare. Available in 100L and 150L sizes, these bins are constructed using food-grade stainless steel, ensuring corrosion resistance and long-term reliability. They feature a smooth, easy-to-clean surface and a secure lid for safe containment. Equipped with four castor wheels, they offer excellent mobility. The bins include a wooden base and aluminum casing for added structural strength, making them an ideal solution for transporting materials or managing waste in commercial environments.
