

Stainless Steel Modular Shelving Racks

Short Description:

Durable, adjustable stainless steel modular shelving racks with customizable sizes and shelf types-ideal for commercial kitchens, warehouses, and more.

Full Description:

Our Stainless Steel Modular Shelving Racks are engineered to provide robust, hygienic, and flexible storage solutions for commercial and industrial settings. Made from high-quality stainless steel, these racks offer excellent durability and corrosion resistance. You can choose between perforated shelves for better air circulation or plain shelves for flat-surface storage, depending on your needs.

The racks are available in various dimensions, ranging from 340mm to 800mm in width, 900mm to 1800mm in length, and 1055mm to 2035mm in height. You can select from 2 to 9 shelves per unit and fully customize configurations to suit your space. Their modular design allows for quick assembly and reassembly, while adjustable shelving lets you change shelf positions as needed. Designed with four sturdy legs for maximum support, these racks are space-saving, easy to clean, and perfect for storing perishables or bulk goods.
